Bayer Group sales and earnings forecast for 2007

Group:

Plan to increase **sales** to > €32bn or about +6%, adjusted for portfolio and currency effects (previous forecast: about 5%).

Intend to grow the **underlying EBITDA margin** by at least 1 percentage point from the 19.3% in 2006 (previous forecast: increase to > 20%).

HealthCare:

Continue to expect that all HealthCare divisions will grow with or faster than the market. Raising the target margin and now expect to achieve an **underlying EBITDA margin** of > 25% (previous forecast: 25 percent). We expect marketing and R&D costs to be higher in the 4th quarter of 2007 than in the preceding quarters.

CropScience:

Anticipate a continuing positive market environment in the 4th quarter. For the full year 2007, we confirm the target of increasing the **underlying EBITDA margin** to > 22%.

MaterialScience:

We do not envisage any significant change in the business environment in the 4th quarter and continue to expect a good, value-creating earnings level. Due to the normal seasonal slowdown in business activity toward the end of the year, we expect **underlying EBITDA** in the 4th quarter to be below that of the third quarter but above the 4th quarter of 2006.

Underlying EBITDA at €715m (Q3'07: €640m), up 11.7%, mainly due to the gratifying increase in business and synergies already achieved. **Underlying EBIT** up 50.5% to €438m.

Consumer Health sales up 6.9% to €1,110m (Fx adj. +10.2%). *Consumer Care*: Bepanthen family grew by 6.3% to €34m (Fx adj. +9.0%). Favorable performance of Canesten (€48m, +17.1%, Fx adj. +20.2%). Underlying EBITDA down by 1.7% to €238m. Earnings on the additional business were offset by the higher expenses for new product launches and expenditures of €15m for the renewal of the IT infrastructure at Diabetes Care in North America. **Underlying EBIT** flat (€206m; -0.5%).

Q3'07 CropScience

Crop Protection sales increased by 13.0% to €985m (Fx and portfolio adj. +14.8%). Sales in the **Herbicides** business slightly dropped 1.3% to €306m (Fx and portfolio adj. -0.2%). Lower sales of cotton and soybean herbicides in NA due to smaller planting acreages were offset by the successful marketing of our young products such as Atlantis and Sekator, particularly in Europe. **Fungicides** sales advanced by 27.6% to €194m (Fx adj. +27.2%), mainly due to higher sales of soybean fungicides in Brazil and of cereal and nut fungicides in the US. **Insecticides** up 5.2% to €281m (Fx and portfolio adj. +10.3%). Confidor turned in a very gratifying performance in an improved LA market environment. **Seed Treatment** strongly up by 42.7% to €204m (Fx adj. +44.0%), driven by the good performance of Poncho and CropStar, which benefited from the increase in global corn acreages and early season in Europe.

Underlying EBITDA climbed by 31.6% to €175m, the positive impact of higher volumes being partially offset by adverse currency effects. **Underlying EBIT** up by €52m to €60m.

Environmental Science/BioScience sales edged back by 2.8% (Fx adj. -1.2%) to €172m. **Environmental Science** down by 7.3% (Fx adj. -4.0%) to €127m, due to a heightened generic competition for Professional Products and unfavorable weather conditions in the US. Sales of **BioScience** unit advanced by 12.5% to €45m (Fx adj. +8.2%), driven by good performance of the canola seed InVigor and from vegetable seeds.

Underlying EBITDA fell by €18m to -€8m, primarily due to decrease of Environmental Science business, higher R&D costs in BioScience and a seasonally negative earnings contribution from the Stoneville acquisition. **Underlying EBIT** at -€26m (Q3'06: -€5m).

Q3'07 MaterialScience

Materials segment sales advanced by 3.2% (Fx and portfolio adj. +5.8%) to €767m. Polycarbonates sales up 1.6% to €706m, mainly due to slight increases in both volumes and selling prices.
